

## WALTHAM WATCHES

The Authentic American Watch

It is a matter of history that the Waltham Watch Company was the first in the world to make watches with interchangeable parts by machinery.

It is a matter of knowledge to all scientific watchmakers that every device and mechanical improvement of importance in the making of watches has originated in the factory of the Waltham Watch Company at Waltham, Massachusetts.

It is a matter of fact that the Waltham Watch Company makes more watches than any other watch company in the world.

It is a matter of general opinion that the Waltham Watch Company makes better watches than any other company in the world.

It is a matter of wisdom to buy a Waltham Watch adjusted to temperature and position and to buy only of a reliable retail jeweler.

**WALTHAM WATCH COMPANY,**  
WALTHAM, MASS.

## Southwestern Mining News

## EL PASOANS WORK MINES IN MEXICO

A. E. Turner and J. M. Smith Continue Development of Progress Co.

A. E. Turner, a mining man, is in town from San Pedro, Chihuahua, where he has been mining for the past two years. He is co-owner with Capt. J. M. Smith, of the customs service of this city, in the Progress silver mine, in the Capulin mountains, nine miles west of the camp of Sabinal, which they have been working and developing on their own resources for several years.

"Our property consists of 10 percent-ages, located along the vein a distance of 1000 meters, or about 3250 feet, and our development has exposed the vein, containing the entire distance, strong and well defined," said Mr. Turner.

"It is a contact fissure between porphyry and a trachyte dyke, having northeast and southwest course, dipping nearly 45 degrees, and being from two to eight feet wide.

"About 300 meters north of the southeast end line we sank our main incline shaft to a depth of 200 feet, all in ore, with levels each 100 feet, and besides have sunk seven other shafts along the vein from 50 to 150 feet deep, and have driven a tunnel from the southeast end of the property in a northwest direction on the vein, which will give us a good depth as we enter the hill.

Ship to El Paso.

"Our ore is a quartz, carrying chloride of silver. We have shipped over 1000 tons of ore to the smelters, running from 30 ounces silver upward, some of our select ore shipped running as high as 270 ounces, and we have on the dump about 3000 tons of ore that will average 12 to 15 ounces silver to the ton, which, while too low grade to ship and smelt, is available for treatment by the cyanide process.

"James Smith, son of Capt. Smith, is an expert cyanider, and put up a small experimental testing plant on the ground, and conducted a long series of tests, which demonstrated that the ore is perfectly suitable to that treatment, and that 80 percent of the values can be saved. We will resume operations the coming summer, and will install a steam or gasoline hoist, so we can sink to 1000 feet. We have been doing all our hoisting with a horse whim, and find it difficult to go deeper than 300 feet with it. There is a vein within a mile of our property that will furnish sufficient water for a plant or 30 tons. The plant recommended by James Smith will crush the ore with rolls sufficiently fine to be cyanided. There is abundance of timber, such as oak, juniper, ash and cherry, covering the entire mountain range, sufficient for all future fuel demands.

"In the same mountain, Paul Traylor owns and is working with a small force of men a group of claims, called the Pismo Blanco, the Virginia, called the Promontorio. He has shipped several cars of ore, which is lead-carbonate, carrying silver, the values running from 15 to 20 ounces silver and 50 to 70 percent lead. His main shaft is down about 125 feet.

"Adjoining us on the south is the La Patria, owned and worked by Cirilo Tafuya and Jose Gutierrez. This ore is of the same character and grade as that of our Progress, being on the same vein. They are shipping a car this week to El Paso."

## WORK ZINC MINE NEAR BORACHO

An Expert Discovers High Grade Ore Is Thrown Over the Dump.

About 150 miles east of El Paso, in this county, and about 10 miles northwest of Boracho, a station on the Texas & Pacific railway, is a zinc district of considerable importance.

A few years ago W. W. Camp and associates, of Pecos and Dallas, did considerable work on a group of claims, the principal one being the Buck, and shipped four or five cars of zinc ore to the smelters of Kansas, which were remarkable high grade and free from impurities. The ore is a zinc-carbonate, running from 40 to 60 percent zinc. Adjoining the Buck are a number of zinc claims, showing the same character of ore.

Dallas Men Work Claims. H. Clogenson and associates, of Dallas, are working the Clogenson claim, which adjoins the Buck. A brother of Mr. Clogenson, an experienced miner, is superintendent of the mine. The official name of the company is the Texas Zinc company.

Joe White, an expert from Joplin, Mo., visited the camp and reported that he found a vein being worked on the Clogenson claim carrying zinc ore running from two to three feet in width, dipping vertically, making it very easy and cheap to work. The owners had drifted 15 feet into the hill.

"I found a large amount of high grade ore in a powdered form had been thrown over the dump," he said. "Zinc ore is very deceiving to the inexperienced, and often the most barren and worthless looking material is the richest."

"Most of the ore is carbonate and very little silicates appear. There is also zinc blende. Mining in this district can

be carried on very economically, as labor is much cheaper than in Missouri, and, besides, there is no water to contend with."

Pecos Concentrating Mill. Mr. White is of the opinion that a concentrating mill would be of great benefit to the miners in that camp. He believes the claims in the new district are very valuable and need only proper development by experienced men.

Lands in the Joplin, Mo., district, which were valued at from \$10 to \$12 an acre before the discovery of zinc, are now selling at \$2000 an acre," he says, "although they have no surface outcrops on them, the only reason for supposing them to have any zinc under them being their proximity to the proved zinc fields. These zinc fields should prove equally as good, as the present workings demonstrate the existence of the mineral."

Two companies of Dallas people are working claims, and recently a party of them came in their private car to see the mines and returned home full of enthusiasm over their holdings. Each company has a capital of \$50,000 and will push operations as fast as possible. The zinc camp is in a low series of hills, called locally "the Apache mountains," which are in the southern end of the Delaware mountains.

## PLENTY OF WATER ON MARFA RANGES

Good Grass Is Assured for Spring—Crops in Good Condition.

Marfa, Tex., Feb. 19.—Reports from many ranches in Presidio county indicate that cattle are in good condition, with ample water supply. Good grass is assured in the spring, owing to recent rains and snow. Crops are reported in good shape, and in some parts unusually fine. Presidio will be a banner county this year.

Mounted inspector John F. Robinson, of Presidio county, was here recently. He has resigned his position with the government and will take another with a rubber manufacturing company. He will leave soon for Torreon, Mex.

Mrs. M. R. Mahon is home from a visit with relatives in Austin. Frank G. Cox, lecturer and entertainer, will be here Sunday and deliver two lectures at the Methodist church.

Bishop J. M. Kendrick of Phoenix, Ariz., wired that he would not be here Sunday as announced on account of Rev. Mr. Carver's absence in Alpine. The latter is rector of the Episcopal church in Marfa, but will be in Alpine until March 1, establishing a church at that place.

Senor Conrado Aguilar, customs inspector of Ojinaga, Mex., well known in Presidio county, was married recently to Miss Marie Spencer, daughter of Arcadio Spencer, who was for many years civil officer in Ojinaga.

G. N. Pettit was in from the Alamito ranch recently.

Attorney R. H. Hays, who has been seriously ill for two weeks, is recovering.

T. S. Hunt, of Las Cruces, N. M., was here recently.

J. A. Henry of San Antonio is here.

Mrs. L. A. Beatty, of Alpine, was here on business recently.

The Murphy-Walker company, through W. F. Gohlke, receiver, has paid 95 percent in dividends, paying the last dividend this week. Mr. Gohlke is well known in El Paso, having handled the Vogue drygoods stock. Since reorganization a year ago, the company has paid a 10 percent dividend and placed 20 percent in a sinking fund.

Mrs. J. P. Shields sponsored a party of young folks at a dance at Fort Davis last night. The party were Misses Lorenna and Mary Shannon, Genevieve Bogel, Dora Kilgore, Messrs. Jordan, Blakely, Cartwright and Ward.

Miss Bill Mellard is here from the ranch spending several days with friends.

Mr. and Mrs. B. B. Russell will spend Sunday in Alpine, the guests of Judge and Mrs. Thomas.

Bryan Cartwright will be in El Paso for a few days on business.

Chas. Lindbergh, who is from the marble quarries near Marfa, recently, and stated the new industry was progressing nicely.

## MEXICAN ENDS HIS LIFE WITH BULLET

Lies in Canyon Many Hours Before Found—Dies in Hospital.

Nogales, Ariz., Feb. 18.—Ramon Gonzalez shot himself in the breast with a revolver while in a canyon near Nogales, Son., this week. The wounded man lay a night and day before discovered and the police notified. He was taken to the hospital, where he died shortly afterwards. He said he shot himself, but gave no reason for the deed.

Mr. and Mrs. W. S. Rogers have gone to Phoenix for the benefit of Mr. Rogers' health.

Eljah V. Currutt, a government mail weigher from Globe, has arrived in Nogales to remain three or four months occupied in weighing the mails in and out of Nogales.

Miss Lucile Newman has gone to Los Angeles to visit her aunt for a short time.

A. M. Conard is up from Sonora on a visit to his family.

J. E. McIntyre is a business visitor from Mina Juarez, near Corboca.

A new Mexican weekly paper, El Azete, has just issued its first publication in Nogales.

Inspector Reynolds is able to be at his post of duty again after an illness of some time.

The little child of Mr. and Mrs. W. H. Smith, is recovering from its serious burns.

Cards have been received in Nogales announcing the approaching marriage of Miss Mary Alice daughter of Mr. and Mrs. J. A. Naugle, to Robert Davis Pringle in the first Methodist Episcopal church at Cairo, Ill., Saturday, Feb. 26.

Mr. Naugle was at one time superintendent of the Sonora Southern Pacific railway.

Attorney S. F. Noon and R. H. Rogers have gone to Tombstone on federal court business.

C. E. Hardy, E. L. Vail and S. Y. Barkley were recent visitors from Tucson.

The Thiel Detective Service Co. has opened offices in El Paso at 219 Chapin Bldg. and is prepared to handle legitimate detective work for corporations, mine owners, firms and attorneys. This service has branches in the principal cities in the U. S., Canada and Mexico. They have both phones.

Globe Flour, best by test, and the payroll in El Paso.

## DEL RIO RANCHERS ARE PUTTING IN BIG ACREAGE OF DRY FARM CROPS

Del Rio, Texas, Feb. 19.—Already plans are being made for the proper representation and exploitation of this section's dry farming possibilities and results to be presented at the coming Dry Farming congress to be held in Eagle Pass in August.

A car of field seeds, including milo, kafir corn, sorghum, etc., has been received by a local merchant and he is confident that this car will not supply the demand that is already being manifested in these crops. One year ago the man who dared to order a car of field seeds would have been thought demented and but little encouragement was given to the pioneers in dry land farming. The results made by those few who believed in it were so forceful, in the face of the driest year in this section for years, that those who were skeptical were made to give the matter some thought.

The ranchers are looking into the possibilities for they are coming to see the wisdom of providing for some of their feed requirements at home instead of shipping it all in. One stockman last season raised over 100 tons of sorghum on 35 acres of very ordinary land and this year many others have signified a desire to try the field crops. As yet no one has really given the crops the thorough and scientific soil culture that is advocated by the genuine dry farmer, but even with many principles neglected the results are sure to be gratifying and the movement will spread accordingly.

One stockman has said that he will put in 40 acres this spring in milo and if he gets results he will double the acreage next year. Those who have tried it are certain that the results will be sure to cause this stockman to put in his 30 acres next season and the whole movement will benefit and be encouraged by these new fields.

The situation is very promising and Del Rio and her progressive people desire to be placed among other sections that are strenuously working for the development of their idle acres and fertile valleys.

## PECOS TO BUILD MANY NEW WALKS

Town to Be Surveyed For Sewer System—News Notes From Pecos.

Pecos, Texas, Feb. 19.—The city council at a regular meeting decided upon having a system of grades established for the entire city. This work will include a complete resurvey of the town, and the establishment of grades for street, sidewalk and sewerage purposes. It is expected there will be several miles of walk constructed the coming summer, and it is for the purpose of securing uniformity in this work that this comprehensive survey is undertaken. The rapid growth of the town demands the building of a complete system of sewers, and this work will be provided for in the plan.

H. E. Steinman, formerly city engineer of St. Charles, has been engaged to make these surveys, and M. L. Swinehart will act as consulting engineer.

S. A. Anderson, formerly assistant chief engineer of the T. & P., has accepted the position of chief engineer for the Pecos Valley Southern railway, and is in the city to personally superintend the construction of the road out of Pecos.

The plat of the town of Sargent, the first town on the line of the Pecos Valley line south from Pecos, has been filed for record in the office of the county clerk. This town site is 10 miles south of Pecos and being surrounded by a fine agricultural country, largely seeded to alfalfa, it is expected there will be considerable activity in the line of building immediately.

The individual electric plant for the music hall has been installed and the motor picture feature of the list of amusements proposed for this place will be inaugurated soon. The plant of the Pecos Light and Ice company was overhauled and unable to furnish light and power for this purpose, requiring the installation of the separate plant.
